

ESCUTCHEON CYLINDER SHIELD

No. 1 Escutcheon

Escutcheon: Single Wing

Escutcheon: Double Wing

Applications

An escutcheon is used to provide a close fit between a paracentric cylinder and the keyhole. It also serves to protect the finish around the keyhole from chipping. The single wing escutcheon allows key to be extracted in only one position. A double wing escutcheon allows the key to be removed in two positions.

Technical Data

- MATERIAL: Stainless steel
- SIZE: 3" dia. x 1/8" TK
- WEIGHT: 0.2 lb.

No. 2 Cylinder Shield

Applications

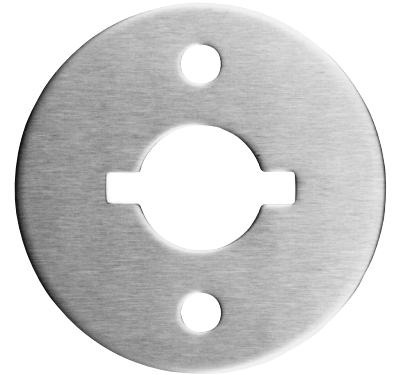

The No. 2 Cylinder Shield mounts over the paracentric cylinder on exterior doors to protect the keyhole from dirt, snow and other foreign elements.

Technical Data

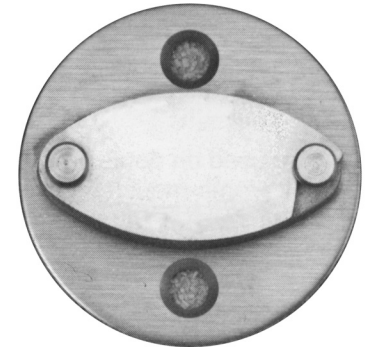

- MATERIAL: Stainless steel
- SIZE: 3" dia. x 3/4" projection
- WEIGHT: 0.5 lb.

219M Mogul Cylinder Shield

Same as above except shield mounts over the mogul cylinder.

No. 1 Escutcheon, Double Wing
